

BLUE ORIGIN

Blue Origin Hosting Job Fair for Machinists and Technicians

Apply online now at blueorigin.com/careers for an invitation to attend on April 17 and April 24.

Blue Origin is seeking to hire 80 skilled technicians and machinists in Washington State who are passionate about the company's mission to lower the cost of access to space. Blue Origin aims to fill these roles within two months to support continued company growth.

To accelerate the hiring pipeline, Blue Origin is holding two job fairs—one on April 17 and a second on April 24—at its headquarters in Kent, Wash. focused on identifying and hiring skilled technicians and machinists eager to work on highly collaborative, inclusive, and ambitious teams in service of building liquid rocket engines and fully reusable, human-rated vehicles that are safe, reliable, and affordable. All attendees will be required to wear masks and abide by strict COVID-19 guidelines for social distancing.

Experienced machinists and technicians are encouraged to apply online to one of the open positions by searching #KentManufacturingJobFair on our careers page. The Blue Origin recruiting team will review each application and extend all qualified candidates an invitation to attend one of the hiring events. The positions we are looking to fill for second and weekend shifts include:

- CNC Machinist
- Machinist II
- CNC Programmer
- Aerospace Technician
- Engine Integration Technician
- Sub-Assemblies Technician
- Cleaning, Passivation and Verification Technician

Blue Origin's team of more than 3,500 dedicated engineers, technicians, and staff are developing human spaceflight infrastructure that will benefit generations to come. To join Blue Origin's mission, either in Washington state or at other locations across Alabama, Florida, or Texas, check out all the open positions at blueorigin.com/careers.
